HYPERION STUD & FARM

Hyperion Stud, LLC is a boutique breeding and sales operation based in the heart of Virginia horse country. We are dedicated to providing the equestrian industry with the best bloodlines out of Europe. Our focus is on the quality, temperament and pedigree of our breeding mares while paying particular attention to the documented success of the stallions we use. Our commitment to excellence drives us in our purpose of unifying European bloodlines with the global breeding and showing experience

Our services are comprehensive as we represent many stallion owners, breed and foal out mares, train and develop young horses and board retirees. In order to accommodate the various activities we have several facilities on the East Coast. The main facility is located in Barboursville, Virginia and encompasses a total of 180 acres. This state of the art equine facility is the heart of our breeding program. In addition to this location, Hyperion owns a 115 acre turn out facility for retirees and young horses.

Our operation ranges from weanlings to top level Grand Prix and Olympic horses in the United States and in Europe. Our development and training is done in house with trusted professionals, which requires a knowledgeable and experienced Team . The breeding decisions along with the sales are managed carefully by the owner, Vicky Castegren.

GLOBAL OPERATIONS

We are now global with the heart of our European operation located in Germany. Our partners in Europe extend to Holland, Belgium and Sweden. We breed and develop a large group of horses and sell semen from Hyperion stallions in several countries. As our operation grows, we continue to be dedicated to the success of our horses and clients.

We proudly support:

Danish Team rider Lars Bak Andersen

Swedish professional Anna-Clara Pettersson

U.S. Olympian Will Coleman III

German professional Alex Liebe

U.S. Professional Jason McArdle

PEDIGREE

Asterix E Z is a beautiful and powerful example of his sire Air Jordan Z. Asterix is a horse with superb technique and endless scope. Piloted by Robert Whitaker as a young horse, the pair successfully jumped up to 1,55m. With even a limited number of offspring out in the world, we see that Asterix successfully passes on his incredible temperament and jumping ability.

His sire, Air Jordan Z, is a stallion who boasts unlimited scope along with a superb character. He had great success in upper level sport with Daniel Deusser and Judy-Ann Melchoir. In his career he was successful in World Cup events along with many top placings at the Grand Prix Level. As a father horse, Air Jordan Z has been given the title of Best Young Horses Sire in Fontainebleau in 2017. Along with being the Best Sire in the Selle Francais stallion licensing for three yr olds.

Dam Sire, Argentinus, is one of the most influential stallions of our time. He has been an outstanding producer of not only jumping horses but also dressage sons and daughters. A successful upper level jumper himself, with numerous results in sport. Argentinus is among Germany's top sires and remained a top sire until his death in 2007.

Asterix E Z has been retired from sport after an unfortunate injury ended his rise to the top levels of competition. He stands annually at Hyperion stud offering fresh semen to breeders in North America.

BUSTIQUE

BEACH CITY
HOLLOW
SPORTFOT

Although his first progeny are only 13 years of age, Bustique is already placed 30th on the WBFSH Sire ranking. Many top riders have welcomed his offspring in their stables and out of his first breeding years, more than 60 descendants are competing successfully at international level. Including none other than the outstanding Grand Prix and World Cup winner Beauville Z (ds.Jumpy des Fontaines), with whom Maikel van der Vleuten made history by winning the individual bronze medal at the Olympic Games in Tokyo in 2021. Last year at the WEG in Herning they added team silver and an individual bronze medal to their impressive track record.

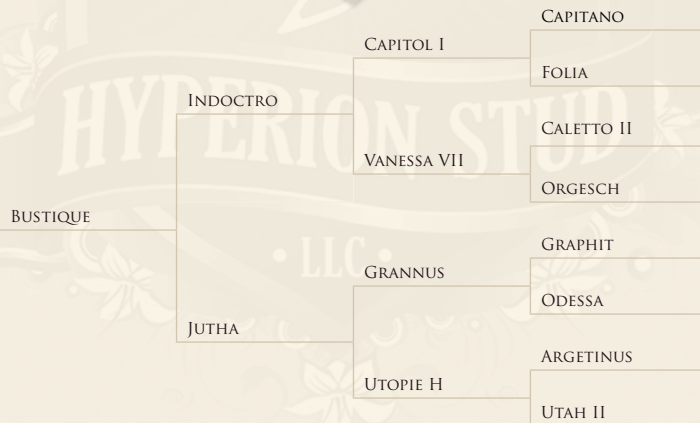

Other remarkable offspring by Bustique include Florida Balia NL, Hendrick's HX, Berdien, Footlose HX and Golia. Time and time again, Bustique proves to breed excellent showjumpers with a winning mentality. Paul Hendrix: "As the saying goes, good things sell themselves. Following in the footsteps of his sire Indoctro, Bustique produces top showjumpers and is considered to be one of the best KWPN breeding stallions of the moment. Almost twenty of his offspring are competing in 1.50/1.60m classes and more than 45 offspring perform at 1.35m/1.45m level."

Bustique himself jumped internationally up to 1.45m/1.50m classes with Michel Hendrix. After a stay in the United States of America for a couple of years he returned to Stal Hendrix in 2019, once again becoming readily available for breeding. Bustique is a full brother to the Grand Prix showjumper Mustique and a half-brother to Grand Prix showjumper Noor, hence he represents a solid performance family and is becoming a top progenitor of well-bred showjumpers himself.

PEDIGREE

Can't Touch This HS descends from one of the most prolific stamm lines in breeding history from the Bahlmann stamm, 776, and boasts some of the most impressive bloodlines today. The culmination of this genetic foundation is expressed through his type, scope, temperament and technique. His stamm line has produced approved stallions, champion mares and top International jumping horses. CTT is no exception to the talent that courses through the decades of production from this family line.

Add on to this outstanding family, CTT's Sire Casall, is one of the most famous jumping stallions of the last decade. Under Rolf-Göran Bengtsson, the pair never ceased to amaze us. Countless wins and rankings as one of the best International show jumping horses of our time, Casall is a natural pick for CTT's motherline.

CTT's Dam, Canturana, has an impressive production career so far. She has produced 2 full brothers to CTT. CTT II was awarded as a championship foal and later approved by the Mecklenburg Verband. CTT III was also a championship foal in 2019. She is mother to CTT's full sister, Grace, who had an impressive Mare Performance Test with a 9.5 in jumping and 8.5 in rideability. Canturana's Sire, Canturo, was the last approved son of the incredible jumping sensation, Cantus. Canturo himself is know for producing unbelievable scope though his offspring. One great example is Cian O'Connor's "Good Luck" who jumped on several Nations Cup Teams for Team Ireland. Canturo competed in the finals of the Bundeschampionat at age 5 & 6 and at age 7 made it to the final stage of the Championship in Lanaken. He was also successful up to 1,60m and was even qualified for the Olympic Games in 2004.

Can't Touch This HS is an outstanding young sport stallion with incredible genetics to pass on. This is a special opportunity to be a part of the next generation of super stars.

CAN'T TOUCH THIS HS

CHIN QUIDAM VDL

Chin Quidam VDL was bought as a six year old from VDL Stud in Holland, he was carefully educated in the American system with thought taken in the methodical progression of his career. Chin Quidam impressed us all with his power, technique and aptitude in the competition arena. In 2014, Chin Quidam truly stood out amongst his peers by beginning his season with several top 10 finishes at WEF in the 1.30m to 1.40m divisions with Irishman Darragh Kenny. That summer was exceptionally productive with several wins in Spruce Meadows in the 1.40-1.45m divisions. With these superb results Team Hyperion found themselves packing up for Europe sooner than expected to join Darragh Kenny in Aachen, Germany. This prestigious event brought Chin Quidam up against some of the best 8 year olds in the world. With his powerhouse pedigree stacked up underneath him and Darragh Kenny in the irons, the pair blew away the competition by winning the Youngster Cup Qualifier as well as the Youngster Finale in Aachen. An astounding result for the horse, the rider and Team Hyperion!

Chin Quidam is an exceptional example of the sire and dams of his pedigree. Sire, Chin Chin has had an enormous influence on the Dutch breeding in the modern day. His sport career was astounding! He competed at two Olympic Games (Seoul & Barcelona) for Team Mexico, twice at the World Equestrian Games and numerous World Cup competitions. He has sired several approved stallions such as Zapatero VDL, Triomphe de Muze and Chin Quidam VDL. Dam sire, Quidam de Revel, was a superior jumping athlete who competed in the Barcelona Olympics winning a team bronze and finishing fourth individually with French rider, Herve Godignon. The pair won several Grand Prix and competed on a slew of Nations Cup squads. Quidam de Revel was ranked #1 for two years in a row in the World Breeding rankings for jumper stallions. He his sire to over 189 approved sons including Quite Easy, Quite Capitol, VDL Groep Verdi and Nabab de Reve. His offspring continue to compete at the top of the sport to this day.

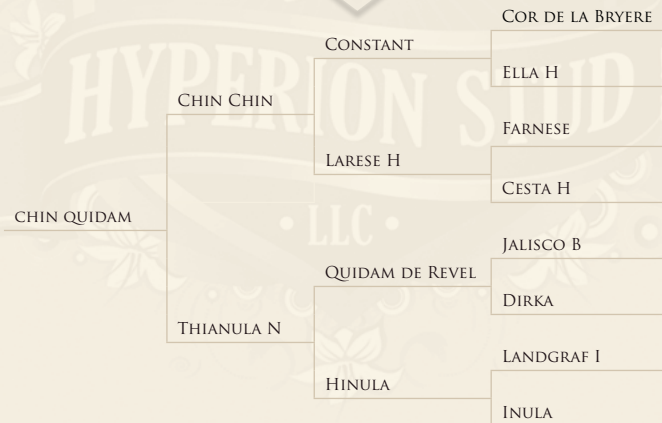

Chin's most notable career highlights in 2014 include winning the 1.40m during week 11 at WEF, winning 3 classes in Spruce Meadows , winning the Sparkassen Youngster Cup Qualifier and Finale in Aachen, Germany, 2 wins in the 8 yr old youngster classes in Dublin, 2nd in the Finale of Dublin, and winner of the 1.50m Grand Prix in Ommen.

Chin Quidam VDL is an exceptional sport horse and breeding stallion. His most appealing qualities include his efficient scope, quick reflexes, fearlessness and easy temperament which is also seen in his offspring. Chin Quidam VDL is best suited for mares who need a stallion with blood and scope.

PEDIGREE

Cicera's Icewater, by Corofino/Cor de la Bryere/Liguster from stamm 474a, is one of Hyperion's most successful breeding stallions. This AHHA, OL and RPSI approved stallion brings strength and versatility to our roster as he appeals to not only show jumping breeders but also to the eventing breeders.

Icewater's sire, Corofino, was widely known for his exceptional ability in sport but mostly in breeding. It began with his 100 day test in Germany where he scored a very rare "10" for jumping. He went on to have a very successful sport career under rider Valério Sozzi, winning several Grand Prix and competed in the World Cup Finals in Milan.

Icewater's dam, Cicera, descends from one of the greatest stamm lines of the modern day, 474a, and is full sister to the great Cavalier Royal. This mother line has been proven time and time again by producing numerous International jumping horses. During her Mare Performance Test, Cicera received a 10 for jumping and a 10 for her ride-ability. She was awarded as a States Premium Mare during her test.

Cicera's Icewater was approved in 2002 becoming the highest scoring stallion ever approved in the 25 year history of the AHHA at that time. He received 53 bonit points along with being crowned the National Conformation Champion. He has been highly successful as a breeding stallion in both show jumping and eventing.

During his career, Icewater competed with team O'Connor and was successful in winning a CCI* in Kentucky and other events along with being ridden up to the Prix St. George level in dressage. He also qualified and competed in the 5 year old YJC Finals at the Hampton Classic.

His offspring have been exceptional over the years with many going on to have successful sports careers. Icewater is truly a stallion for sport breeding but also produces top breeding mares. His offspring are well tempered, athletic, big movers and scopey.

CICERA'S ICEWATER

DAKOTA VDL

Dakota VDL aka Conquito, is a modern sport horse who is beautiful type with lots of expression and character. He has a great ride-ability showing a very athletic trot, and a very balanced, light-footed and powerful canter. He demonstrates scope, with very good take off and reflexes. He has powerful haunches, clean and careful technique with mature self control. He is a wonderful addition for breeders of North America.

Dakota's sire Casall is a multiple Grand Prix winner with Rolf Goran Bengtsson at competitions like Lyon, Hamburg, Rotterdam, Stockholm, Oslo and finished 6th in the 2012 World Cup Finals as well as competing in the 2012 London Olympic Games. Casall is considered one of the top jumping stallions of the modern day. In breeding, he breaks through with successful offspring in the international young horse classes, produced the 2008 "Mare of the Year" at the Eilte mare show, and has several approved sons which include Connor, Zavall VDL and Catch It and Dakota VDL.

Dakota's Grand Sire is the Holsteiner stallion Contender. Contender is the sire of 40 approved sons and 40 premium mares. He is a living legend in sport horse breeding for jumping and dressage with offspring like Checkmate and Montender.

Dakota's Dam Naomi II is the full sister of the BWP approved stallion Cicero van de Helle. This well known Holsteiner family boasts famous offspring such as Corland, Corradina, Landetto, Leuthen I & II and more.

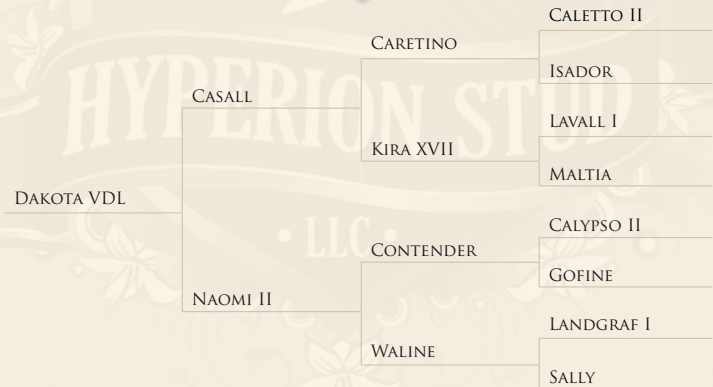

Dakota's Grandsire Landgraf I is one of the most successful sires of show jumpers the world has seen, and his genetics can be found in hundreds of today's modern sport horses. Landgraf has produced over 300 approved sons such as Libero H, Burggraaf, Loutano, Landadel and continues to influence the Holsteiner breed today.

Dakota was inspected and approved by the BWP NA in 2012 and received one of the highest scores in their history with an 87! Also in 2012, Dakota VDL was approved by the AHHA with an overall score of 74.5%. Dakota VDL is a beautiful example of his sire, Casall. Dakota is suitable for all disciplines in breeding, and is best matched with larger framed, leggy and blooded mares.

	KARANTA	FURANTA
ENTERTAINER		COR DE LA BRYERE
	CORLAND	THYRA
SHILAVSCA FORTUNA		VOLTAIRE
	MHILAVSCA FORTUNA	ILAVSCA FORTUNA

The oldest offspring of Entertainer are already competing at international 1.50/1.55m level, such as Isa, Joelina and Izabella L. This impressive stallion proved himself as a good showjumper with Pieter Keunen and Michel Hendrix up to international 1.60m level. Entertainer was placed in the 1.55m Grand Prix of Oplabbeek, was runner-up in the 2* Grand Prix of Kronenberg and finished fifth in the 1.50m class of Saint Tropez. After an injury, he returned to the international sport at the end of 2022 and in Oliva he won the 1.45m ranking class with his new rider Gaj Riessa.

Paul Hendrix: “From his first breeding years, Entertainer’s offspring gives a positive impression in the sport. The older they get, the better. We also notice this with the offspring of Entertainer that we train in our stable, they are all making great progress. He is gradually developing into a very valuable breeding stallion.” Several of his offspring have competed at the World Championships for young showjumpers successfully and Entertainer is also leaving his mark in other (international) young horse competitions. For example, in the Dutch championships for young horses, where his promising son Lambrusco finished in second place in the five-year-old final.

Given his excellent pedigree, it is no wonder that Entertainer is an asset in breeding. He is sired by the Grand Prix stallion Warrant, who also produced World Champion Garant and several other Grand Prix showjumpers. From this direct line also descends international showjumpers such as Bulavsko, Brighton Bay, Zellobee and Bull Run’s Divine Fortune.

ENTERTAINER

HH CONRAD

HH Conrad is not only a top sport horse but his offspring prove he's a top breeding stallion as well. HH Conrad aka Conrad de Hus, successfully jumped in the World Cup Finals, Nations Cup for both Belgium and the United States and numerous 5* competitions around the world. Under the guidance of Belgium's Gregory Wathelet, the pair earned the individual silver medal at the 2015 European Championships and then went on to capture the gold medal at the 2015 Nation's Cup Final in Barcelona, Spain. Gregory and Conrad's incredible performances in 2014 and 2015 caught the eye of Double H Farm. Not only would he become a top performer for their show string, but a powerhouse breeding stallion in addition to the many other stallions they offer to breeders.

Conrad's Sire, Con Air, is arguably one of the best sons of Contender. Under the saddle of Lars Bak Andersen, Con Air was successful in young horses classes and all the way up to Nations Cup.

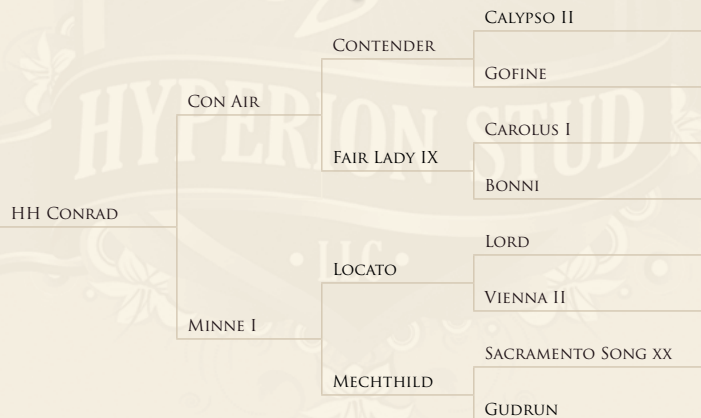

His Dam, Minne I, is a Premium mare who firmly sets the family line with Holsteiner stamm 2067. This powerful stamm line has produced numerous top international sport horses and stallions. Minne did not fall short of this legacy by producing Conrad. This strong family line is also evidenced in Conrad's excellent offspring.

It is already evident that HH Conrad is an outstanding choice for breeders. He already has several approved sons and his offspring are showing their talent in competition today.

PEDIGREE

HH Copin Van De Broy is an exceptional stallion who has proven time and time again to be a worthy son of Darco. In 2005 he was approved by the BWP and in 2011 approved in France with the Selle Francais stud books.

Early in his career Copin Van De Broy proved to be a top show jumping prospect by accumulating top results in the 7 and 8 year old divisions. At age 9, Copin stormed onto the world stage in a big way by being selected for the European Championships. In that same year he won the World Cup Grand Prix in the Mechelen CSI5*, and was the winner of the Sires of the World in Mechelen CSI5* under the rider of Gregory Wathelet.

In 2012, Copin came to the stables of World renowned German rider, Marcus Ehning. The pair had great success on the International scene including wins in the Nations Cups of Rotterdam and Rome along with numerous top placings in World Cup events and Grand Prixes.

Copin Van De Broy's sire, Darco, was voted best sire in the world in 2010 for the fourth year in a row, and he has produced over 3000 foals in his breeding career such as the famous Sapphire who is currently ridden by McLain Ward. His success as a breeding stallion continues today even after his death in 2006. During his show jumping career he made his mark at the Olympics Games, World Equestrian Games and countless World Cups and international events with Ludo Philippaerts.

Copin's Dam, Queen, is a successful producer of International jumping horses including Unique van de Broy, who had top placings at several international 1.50m competitions with his rider Peter Postelmans. She is also the mother of several approved stallions such as Casado van't Gelutt and Eurocommerce Panama (ex. Contrex van de Broy).

Now piloted by Quentin Judge, Copin Van De Broy continues his success internationally. He is a top stallion choice for breeders who are looking for power, scope, a strong canter and length in body. He is best suited for mares with ample blood and modern conformation.

HH COPIN VAN DE BROY

HH RADCO

HH Radco aka Radco D’Houtveld is proudly offered to breeders through Hyperion Stud. This Elite BWP stallion is a superb example of his pedigree by demonstrating power, scope and aptitude.

HH Radco stormed the show jumping scene in 2010 under French superstar, Kevin Staut by showing himself as a top competitor in the 1.50m level. Radco then went on to Double H Farm under rider Quentin Judge. This duo earned several top placing at the Grand Prix level including a 6th place in the \$75,000 Pennfield CSI2* at WEF in 2011.

Radco’s Sire, Darco, was voted best sire in the world in 2010 for the fourth year in a row, and he has produced over 3000 foals in his breeding career such as the famous Sapphire who is currently ridden by McLain Ward. His success as a breeding stallion continues today even after his death in 2006. During his show jumping career he made his mark at the Olympics Games, World Equestrian Games and countless World Cups and international events with Ludo Philippaerts.

Radco’s Dam, L’atome, descends from some of the most famous Holsteiner bloodlines which include the great Landgraf I. This Rhinelander mare is the daughter of the Holsteiner stallion Larome from stamm 1811. This son of Landgraf I who was licensed Rheinland, KWPN, Oldenberg and more is seen in the pedigrees of many top jumping horses today.

He is an excellent choice for breeders looking to improve a mare’s temperament and scope.

PEDIGREE

HH Messenger is an exceptional stallion on many levels. During his 30-day stallion test he scored an impressive 10.0 in free jumping showing remarkable willingness and movement to finish his test with an amazing 9.40 score.

With his tremendous scope and ability, HH Messenger proved he was worthy in 2014 by becoming the German Vice-Champion of the seven-year-old at the Championships in Warendorf with Florian Meyer zu Hartum. A remarkable beginning to his career which would lead him to continued success in the L and M levels before landing with American Grand Prix rider, Quentin Judge. The pair would go on to have many top 12 placings in the 1,40m- 1,60m.

With this powerful pedigree behind him, HH Messenger is a wonderful choice for breeders who are looking to improve scope and ride ability. His offspring are making waves in the sport with hundreds of offspring jumping up to 1,60m as well as several approved sons including the very special Meganus PS.

ANDREW RYBACK 2018

HH MESSENGER

IMOTHEP

In 2007 Imothep completed his 30-day trial in Zweibruecken, Germany with the overall score of 8.1, and was victorious in his sporting debut in jumping tests Class A and L. In 2008 he was the winner in the young horse M classes with scores up to 8 and 9. These results qualified him for the FEI World Breeding Championships for young horses in Lanaken, Belgium in 2009.

Imothep is a star in the show jumping world and breeding industry. In 2007 he was approved by the OL, RPS and ZfdP studbooks in Germany. In 2011, Imothep was fully approved and licensed by the BWP and awarded the “Elite” status, becoming the only Indoctro son in Europe and North America who has been given this acknowledgement. In 2014 Imothep was awarded the Ambassador status with the BWP, was fully licensed with the KWPN and approved by AHHA. Imothep was acknowledged as the 2015 Horse of the Year with KWPN-NA.

Imothep has a wonderful temperament, class A jumping style, impressive athletic power and beautiful movement. He is naturally balanced, intelligent and is proven as a top jumping athlete as well as breeding stallion.

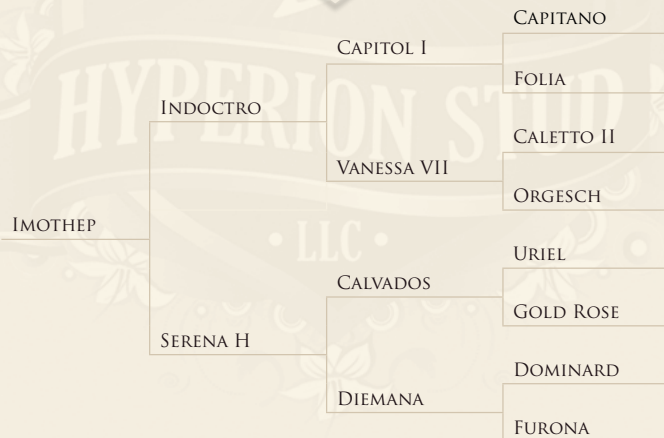

As a breeding stallion, Imothep has produced champion and premium foals as well as successful sport horses in multiple disciplines both in the US and in Europe. Imothep’s progeny are beautiful, well tempered and possess big movement through the hind end. He is a stallion who offers his best qualities to each and every foal.

As a sport horse, Imothep has acquired numerous results at the National and International Grand Prix level throughout his career. In 2014 his greatest accomplishments included 3 Nation’s Cup events for Team Ireland at Aachen (4/0), Hickstead (0/0) and Dublin (4/0). That same year, under Irishman Darragh Kenny, the pair finished 12th of 153 horse/rider combinations at the 2014 World Equestrian Games in Normandy, France. Taizo Sugitani of Japan joined forces with Hyperion Stud to take over the reins on Imothep for 2015. In 2016 the pair competed in the XXXI Olympic Games in Rio for Team Japan.

PEDIGREE

BWP Ambassador Stallion, Orlando, is a top choice stallion for breeders in North America. Orlando is producing first-rate and competitive offspring such as Lauren Hough's hot shot mare, Ohlala. Many have won foal championships and have brought record auction prices.

Orlando's Sire, Heartbreaker, is Keur stallion who has produced numerous offspring jumping at the upper levels of the show jumping sport. As well as several approved sons including the 2006 Belgian Stallion Selection Champion Dulf Van Den Bisschop. Heartbreaker is still predominant in today's breeding and is one of the leading stallions on the Dutch and Belgian jumping indexes.

Orlando's Dam Sire, Darco, was voted best sire in the world in 2010 for the fourth year in a row, and he has produced over 3000 foals in his breeding career such as the late Sapphire ridden by McLain Ward. His success as a breeding stallion continues today even after his death in 2006. During his show jumping career he made his mark at the Olympics Games, World Equestrian Games and countless World Cups and international events with Ludo Philippaerts.

In sport, Orlando had great success with riders Dirk Demeerman and Darrah Kerrins which began during his young horse years in Europe. His resume includes the 2002 6 yr old Belgian Champion, 2nd in the 7/8 yr olds in Aachen, winner of the 2004 CSIO4* 1.50m in Lummen along with many more wins and top five results throughout his career.

Orlando is a stallion who expresses big scope, superior technique along with a gentle temperament and is a horse for all riders. These traits are passed along to his offspring and have been proven as successful sport horses throughout the world today.

POPEYE K

Popeye K was bred in Ashton, Ontario at Ashland farm. Popeye K is by the great Voltaire, who has produced several offspring that compete at the international level or are excellent sires themselves, including Finesse, Helios, Play it Again, Altair, and Concorde. The dam of Popeye K includes the great show jumper and sire Ramiro Z, who was the leading sire of jumpers in the world throughout much of the 1990s, and who produced the likes of Ratina Z, Zamira, and Donau.

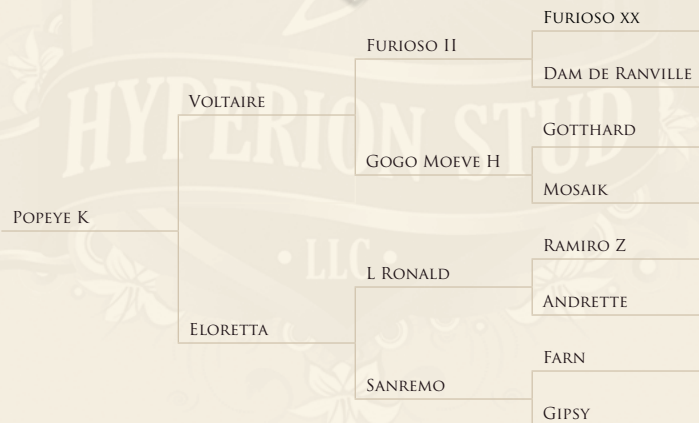

Popeye K began his training in 1999, before attempting his Canadian Warmblood testing in September 2001 during which he finished Reserve Champion. In 2002, Popeye K was shipped down to Ocala, Florida to begin his show career, where he competed in the Pre-Green Hunters. The following year he was sent to Virginia to train with the great hunter rider Tommy Serio, before continuing his show career.

Popeye K has had great success in the show ring. He was named the Horse of the Year Green Conformation Hunter by the United States Equestrian Federation in 2004, and in 2005 was named Show Hunter of the Year by The Chronicle of the Horse magazine. In both 2005 and 2006 he was named the Reserve Horse of the Year by the USEF and the Regular Conformation Hunter of the Year by the Show Hunter Hall of Fame. In 2005, 2006 and 2007, he was named the Winter Equestrian Festival Circuit Champion in the Regular Conformation Hunter division. He is known for his jumping ability and great temperament and has produced several hundreds of foals that are now competing in the sport successfully.

PEDIGREE

Triomphe de Muze is a son of the great Chin Chin! Triomphe's sire Chin Chin, competed at two Olympic games. In Barcelona and then in Seoul placing 6th individually. He was also winner of five consecutive North American league World Cup Qualifiers and competed twice at the World Equestrian Games. Chin Chin sired several approved sons including Triomphe De Muze, Zelote VDL and Zapatero VDL.

On his dam side, Triomphe has the world renowned Galoubet, sire of an Olympic champion Baloubet, and Grand Sire of world champion Liscalgot. Triomphe's dam Caprice won the semi-final for the 6 year-olds in the Belgian Championships in Gesves in 1996.

Triomphe has the highest index of a stallion stationed in Belgium in January of 2005 with 188 points. He has already produced an approved KWPN son, Triomphe W, who's foals have sold for high prices at prominent auctions across Europe.

Triomphe de Muze produces energetic, elastic, supple, and athletic offspring who have consistently proven themselves in sport around the world.

After a successful career in the United States, Triomphe was sold back to Europe as a breeding stallion. Due to the small amounts of semen still in the United States, we are limiting semen sales to owners of breed registered approved mares only

TRIOMPHE DE MUZE

URTHAGO

Urthago was bred by Hyperion Stud and approved as a stallion by the Holsteiner Verband at the 2019 in Neumünster, where he was considered as one of the crowd favorites.

He possesses nearly perfect conformation and has unlimited capacity in his jump. He is an exceptional modern horse for today and tomorrow's breeding of international jumping horses.

Urthago has a very unique pedigree that descends from one of the best motherliness in the world , Holsteiner stamm 474a. His father Uriko, is one of the top breeding stallions in his age group while jumping to the Grand Prix level himself. His mother's father, MyLord Carthago, is currently the 4th ranked sire in the world on the current WBFSH ranking. His great grandmother, Ligusta, is the full sister of the legendary Cavalier Royale.

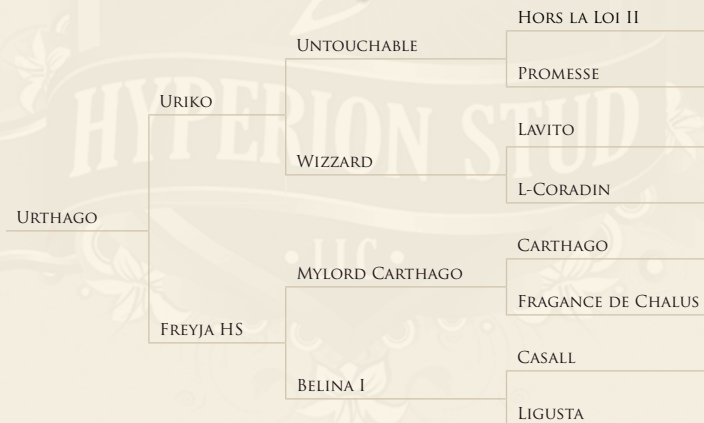

His first 2 foal crops show his top potential as a sire. His offspring have inherited his beautiful modern type, superior topline, correct conformation and his immense canter. Three out of his first 9 foals were selected for the German Foal Championships. He continues to produce exceptional foals year after year.

The former breeding director of the Holsteiner Verband, Dr. Nissen, wrote this about Urthago after his approval. "Urthago's top correctness and conformation make it easy for him to show super movements in all 3 gaits. Walk is elastic and well balanced , especially trot and canter are top quality because of the super active hind end and this you could see especially in jumping. In jumping , the stallion is demonstrating a top forward canter with a perfect bascule and reflexes in combination with top scope. His very exclusive pedigree also shows his big value as a breeding stallion and a sport horse."

PEDIGREE

Vegas aka Velusinus R, ridden by American rider Christine McCrea, is “the horse of a lifetime”. Chris McCrea piloted Vegas to the only clear round in the Syracuse World Cup Qualifier in 2008, and also that year finished 11th in the Beijing Olympic Trials. From 2005-2010, this pair accumulated numerous wins including back to back wins at the Hampton Classic and Gold Cup World Cup Qualifiers, qualified for 3 World Cup Finals, competed at the World Cup Finals in Las Vegas and was short listed for the World Equestrian Games in Aachen, Germany. This special team also competed on several winning Nations Cup and Super League teams throughout Europe.

Vegas is a horse with a more traditional pedigree and is very popular amongst American breeders. His offspring are now stepping into the sport and performing with great potential. Vegas passes onto his offspring a wonderful temperament, strong work ethic and eagerness to perform. His offspring show superb jumping technique and scope and are now producing superb results in sport. Charlotte and Boston a both qualified for the finals 5 & 6 year old finals at the Hampton Classic in 2012. Charlotte was ranked 4th in points in the 2013 USEF standings for the 6 yr olds.

Vegas is a world class stallion with world class breeding making him a perfect choice for breeders who are looking to take their breeding program to the next level!

VEGAS

OUR PARTNERS

We are delighted to introduce you to our partners here at Hyperion Stud, Cavalor, Ramard, BoneKare USA, Top Jock Tack Boxes, Dominion Hemp bedding, Bemer, CWD and Hallway Feeds. Between them, they provide an arsenal of tools and services that are utilized in almost every aspect of our operation, and provide a valuable contribution toward our continued success. We highly recommend these companies and invite you to take a look at what they have to offer.

Top Jock Tack Boxes specializes in building luxury boxes that are customized to the specific requirements of an equestrian athlete. Any size, color and layout can be designed and finished with custom graphics and solid oak engraved panels to feature an athlete's sponsors, country, website, stable or other details. Top Jock's custom boxes offer a wide range of high quality boxes including horizontal trunks, vertical lockers, grooming boxes, saddle racks and more.

Ramard Inc. is an American manufacturing company dedicated to the highest quality health and performance products for horses and pets since 2006. Comprised of a dedicated team of veterinarians, trainers and biochemists, Ramard Inc. has consistently produced the most powerful and effective products on the market today. Our goal is to create and produce innovative, cutting edge products that are made with only the highest quality ingredients available and are free of fillers and artificial ingredients.

www.ramardinc.com

BONEKARE® WITH KQ® The active ingredient in BoneKare® is Vitamin KQ®, a patented, UV-stable, water-soluble, highly bioavailable form of vitamin K1. Vitamin KQ® activates the horse's own natural production of Vitamin K2, leveraging the body's intrinsic regulatory and absorptive capacities, ensuring the vitamin is used as efficiently, safely, and effectively as possible. Formulated with the optimal amounts of Vitamin KQ®, Vitamin D3 and Calcium, BoneKare® works in synergy and is the complete package for optimal bone and soft tissue health.
